

Trend Indicator of Output

2018, November

Output of the national economy grew in November from the year before, decrease from the month before

In November 2018, working-day adjusted output was 1.8 per cent higher than one year before. Seasonally adjusted output was in November 0.3 per cent lower than in the month before. According to revised data, working-day adjusted output increased in October 2018 by 3.2 per cent (previously 2.9 per cent) from October 2017.

Volume of total output 2005 to 2018, trend and seasonally adjusted series

The series of the Trend Indicator of Output are seasonally adjusted with the Tramo/Seats method. The latest observations of the series adjusted for seasonal and random variation (seasonally adjusted and trend series) become revised with new observations in seasonal adjustment methods. Revisions especially at turning points of economic trends may be significant, which should be taken into consideration when using seasonally adjusted and trend data.

Working day adjusted change of total output from previous year's corresponding month, %

Working day adjusted primary production grew by around seven per cent, secondary production by slightly over one per cent and services by about two per cent from November 2017.

Primary production refers to agriculture, hunting, forestry and fishing. Secondary production includes manufacturing and construction. Services comprise trade, hotel and restaurant activities, transport and business activities, as well as real estate, renting and research services, financial intermediation and insurance, and public services.
