

# New orders in manufacturing

2020, April

## New orders in manufacturing fell by 13.0 per cent year-on-year in April

According to Statistics Finland, the value of new orders in manufacturing was 13.0 per cent lower in April 2020 than twelve months earlier. During January to April, orders decreased by 8.3 per cent from the year before. Orders have declined continuously for four months.

**Annual change in new orders in manufacturing (original series), % (TOL2008)**

In April, enterprises in all manufacturing industries received fewer orders than twelve months ago. In the chemical industry, new orders decreased by 1.3 per cent from the previous year. In the metal industry, orders declined by 13.5 per cent and in the manufacture of paper and paper products by 18.0 per cent from one year ago.

When interpreting these statistics, it should be borne in mind that they typically show strong fluctuations by month. Even new orders of substantial value are not examined over extended time periods but for the statistical reference month only.

#### Change in new orders in manufacturing 4/2019– 4/2020

The index of new orders in manufacturing describes development in the value of new orders received by enterprises for commodities and services that are meant to be produced by establishments located in Finland. These statistics are based on non-probability sampling, in which the basic observation unit is an enterprise or a kind-of-activity unit. The sample comprises monthly 400 to 450 enterprises or their kind-of-activity units. Index point figures and annual change percentages are published monthly for four industry categories. The time series start from January 2005 and their base year is 2015 (2015=100). The index figures may become slightly revised as new data accumulate and enterprises report changes to their data. Due to supplementations, the latest 12 months are revised in the releases. A detailed description of the statistics and the calculation method are included in the quality description on the home page of the statistics.
